OUR MISSION

Code Future strives to bring the most fundamental principles of computer science to Elementary and Middle School children in the most engaging way possible. Similar to the way math and science classes are taught early on in order to pave the way for more complex lessons, Code Future hopes to do the same for computer science.

SCRATCH

We would like to invite students to join us as we teach Scratch for free through a six week online summer course. Scratch is an educational programming language to help young programmers learn game development and the fundamentals of computer science. Our course will run from June 24th to August 8th, and any 1st-6th grader can join! .

SO WHAT ARE YOU WAITING FOR?
